January hath xxxi days.

Old Janus will's thee keep thy Body warm,
With Kitchen Physic thy Diseases charm.
Sweet Wine is good, but Exercise is best,
For him that in old Age would live at rest.

Contemplations Morral and Divine, by Sir Mathew Hale, late Chief Justice of the Kings-Bench. Sold by Joshua Phillips, and Henry Rhodes.

An

An Astrologo-Physicial Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars in even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	}	bleed the	{	♈, or ♎.
		Cholerick				♉, or ♊.
		Phlegmatick				♋, or ♌.
		Melancholy				♍, ♎, or ♏.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☾ is in ♉; with Pills, when she is in ♈; with Potions, when in ♋, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♈, ♎, or ♋ in any good Aspect of ☉, ☿, or ☽.

Clysters are most conveniently administered, when the ☾ is in ♋, ♎, or ♏, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♋, ♌, or ♎; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♉, ♎, ♏, or ♈, in Aspect of ☉, or ♋.

Convenient to cut Hair, the ☾ being in ♎, ♋, ♏, or ♈, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a pair of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE 1683.

Of the Luminarian Eclipses this present Year of
1683.

AS the Stars of Heaven (to follow the Opinion of the late Learned Sir. George Wharton) are the most excellent Characters of the Divinity, Power, Wisdom, and Glory of their Creator, in that they are written and Engraven by the Finger of God himself, (the Father of Lights,) *Quibus invisibilia Dei intelliguntur ac providentur, ipsaque aeterna eius Potentia, Quibus Gloria Dei Enarratur:* so among the Coelestial *paucis* *enno*, the Doctrine of Eclipses takes precedence, because that from their Observations, the Primary Foundations of the whole Body of Astronomy are Confirmed, Evinceed and Demonstrated.

For, (seeing that the Sun is Eclipsed only in his Conjunction with the Moon, and the Moon in her Opposition to the Sun. we Conclude the Cause of the Sun's Eclipse to be the Interposition of the Moon between Him and the Earth, and the Cause of the Moon's Eclipse, the Interposition of the Earth betwixt her Body and the Sun's.

Thus the solar Eclipses do manifest the Moon to be Lower and Less then the Sun. The Lunar evince the Earth not infinitely below us, (as Xenophanes Colophonius trifled :) But that the Heavens (under us) are distant from the Earth as far upwards, (in respect of those that be in our Antipodes,) as here they are: And consequently that the Earth is not Cubical, nor Pyramidal, Scapherical, or otherwise Hollow, nor Tympanoidal, nor Cylindroidal, but on every side perfectly Round, or Terminated by a Globosous Figure: Because, that not only the Shadow of the Earth (in the Moon's Body) is always, and on every Part Observed to be Round, but also for that such as Live Eastward do number more Hours from their Meridian for the Beginning or Ending of an Eclipse, then such as Live Westward, proportionally to the distance.

TRIGGE 1683.

By Eclipses of the Moon also, we know, that the Earth is moved (or placed) in the midst of the Zodiac, because that she is eclipsed only in the opposite Places thereof.

The Oriental or Occidental Eclipses of the Moon tell us, one half of the World is always visible, and that daily, one half of the Zodiac rises above the Horizon.

The Lunar Eclipses best discover round the Longitude of Places upon the Earth, and assure us that the Earth and Water make but one Globe.

That the Mountains on the Earth are not to be compared to the Signes thereof, the equal Roundness of the Shadow tells us, where in we observe no Hincity or Clefts by reason of the Valleys, nor yet any part thereof extended more then the rest, because of the Mountains.

And, although the true and certain place of the Moon cannot be taken by any Instrument whatsoever, because of her Parallaxes: Nature, or rather the God of Nature hath supplied this defect by her Eclipses. For the Moon Posited in Mediis tenebris, is then understood to be Opposite to the Sun; By these defects therefore, the Motions and Mutations of the Moon are found out and rationally Demonstrated.

Lunar Eclipses demonstrate the Shadow of the Earth to be Conical, Terminating in a sharp Point: And in the same Place of the Moons Transits to be sometimes thicker, otherwhiles more slender, notwithstanding a certain Rule and Respect had to the Suns Motion: And consequently, that the Sun is moved, or so seems to be, in an Eccentrical Orb.

Hence likewise we Gather, That the Sun is far greater then the Earth, and the Moon Lesser: so the Solar Eclipses demonstrate the Distances of the Luminaries from the Earth to be different, and therefore to be moved in Eccentriques or Epicycles. Hereby also a Rule is found out for Measuring the Distances of the Sun and Moon from the Earth, and the Magnitudes of their several Bodies.

And lastly, by Eclipses of the Luminaries, The God of Nature forewarns this sinful World of the Revolutions of Kingdoms and States, the Death and Detriment of Princes, Governours and Great Men, of Heresies, Sells and Seditions in the Church. Al-

visions of Law and Customs, of Drought and Inundations of Rivers, Wars, Famine, Plague and Pestilence: In a word, the Mischance of all sublunary things.

Levate in Excelsis Oculos vestros: & videte quis creaverit ista]

There will be in this Year 1683, according to the Astronomical Calculation, Three Eclipses of the Two Great Luminaries of Heaven: One of the Sun, and two of the Moon.

The First will be of the Sun on January the 17. day, between two and three of the Clock in the Afternoon. Or to speak more precisely, it will happen just about two houres, ten minutes P. M. in eight degrees, two minutes of the Celestial Water-bearer, and if the Air be clear, will be seen, of us in England, there being not less than Nine Digits of the Sun's Body obscured, as is to be seen by this Figure thereof:

This Eclipse happens in the Eighth Angle of the Heavens, and the Celestial Crab in Horoscope at the time thereof, and Saturn with Jupiter in the second, in opposition to the Luminaries, and so the good Planet Venus also, whence it seems to bode great Detriments, and Death also, to many very Great Persons of both Sexes; But it concerns not England in particular, because that Kingdom is belonging

to the first Quadrangle. Albeit its Influence Reacheth all particular Persons that have Aquarius, Taurus, Leo, Scorpio, viz. the First Decanate thereof for their Horoscope, Sun, or Mid-Heaven, in their Nativities. I should Point out some Persons of great Eminency that it Relates unto, but for peculiar Reasons shall forbear.

The Second will be an Eclipse of the Moon, on February the first day, about three in the Afternoon, in twenty and three degrees of Leo, near the Lions Heart, but invisible as to us, the Sun being as above the Earth.

The Last will be of the Moon also, upon July the twenty eighth day at Eight of the Clock before Noon. It is Celebrated in Fourteen degrees of Aquarius, viz. within six Degrees of the Eclipse of the Sun in January, but this also will be invisible as to us.

TRIGGE 1683.

In this year also there happens a famous Conjunction of Saturn and Jupiter in Leo. These Planets have a Triple Congress in that Fiery regal Sign, which Astr-ologically bodes great Alterations in the World. I will Give you the Famous Argol's words therof, viz.

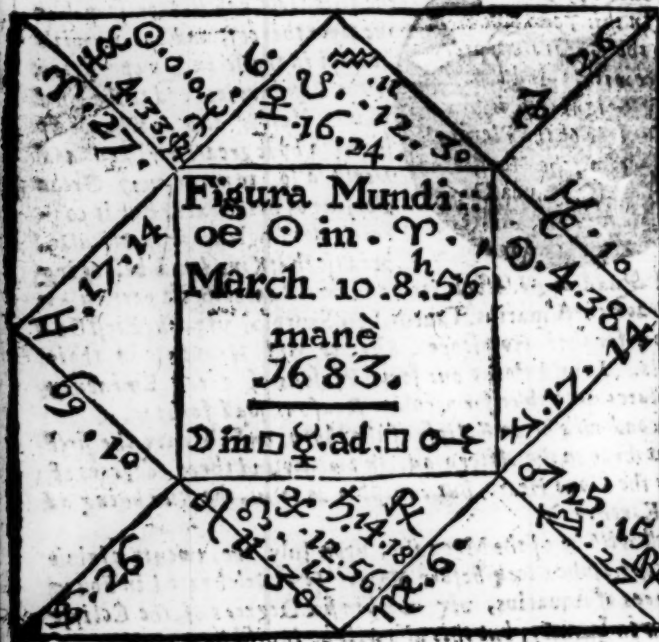

Cum Celebretur Conjunctio Superiorum Saturni & Jovis, in Trigone Igneo, Antiquorum consensu mutationes magnæ contingent, & generales Constitutiones, ac de facili Dominiorum mutationes.

² Besides, these great Conjunctions of Saturn and Jupiter, I find the Fiery Planet Mars, corrupting the Sign of Justice near Eight Months together, viz. from November the 26th. day, Anno 1682. unto July the 12th. this year 1683. ——— A tedious Transit, and of a most mischievous Tendency in Earnest.

Of the Four Seasons of the Year.

First, Of the Spring-Quarter.

When the Royal Lamp of Heaven Mounts the Ram, the Spring

TRIGGE 1653.

According to the Astronomical Tables in the Doctrine of Navigation, as any one may prove that pleases to take the Pains.

In this Celestial Figure the Moon is with them, the Orb of a Quadrant of the Sun, in Partial Quadrant of Mercury, and carrying their Light to Mars by a Quadrant also, and he Retrograde on the Cusp of the Sixth Angle, while he is in Detriment near the Cusp of the Eighth.

Which Positions portend many Distempers, in young People especially, engendered from a Corruption and Purification of Blood and Red Cholera, viz. Imposthumations, Ulcers in the Reins or Kidneys, Ghonorrhæas, Fluxes, Bitches, Boiles, Canchures, the Hemorrhoids or Piles both inward and outward, Pains and Distempers in the Head and Eyes, Small Pox, Measles, weak Stomack and Lungs, &c. And a kind or Species of the Plague or Pestilence in General.

And here is to be feared, not only the Death or Mortality of many Youth or young People, but some Great Ones also; stately Cedars in this Year, as well as Shrubs, are like to become Captives to the Great Devourer, especially such whose Genitures consist herewith. And this Affliction by Death, and some Contagious Distempers reigning, is so much the more probable, in that the Eighth Angle of the Plenilunium, preceding the vernal Equinox, is become the Horoscope of our Mundane Figure.

Venus with Cauda Draconis in the Mid-Heaven, and in Opposition of Saturn and Jupiter, intimates Women Generally in this Year to Aim at a kind of Dominion and Superiority over their Husbands; And by reason of Libidinous Courses, to Live at great Discord and Variance with them; And many of them (especially such as have been married at unkind times) to Separate from their Husbands, and live Scandalously, procuring Dishonour and Disgrace, Shame and Discontent to Themselves, Relations, Children and Families, I should have taken Notice of many other very Remarkable Matters in this Figure. 1. As the Conjunction of Saturn and Jupiter in the Fourth Angle, & in Dignitatibus Solis. 2. Mars, his husband being in a Sextile of them from Libra, by a Retrograde Motion. 3. Of the Moral Significations of the Moons Square, to the Sun and Mercury. 4. Of the Great Correspondencie betwixt

reitereth the several Figures, and the Natives of the Famous City of London, cum multis alii, &c. But my Room is too narrow for the full mentioning of such Matters, and their more Copious Significations, and therefore I must be forced to break off abruptly and Husten unto.

2. The Summer or Festival Quarter.

The Summer or Festival Quarter alwayes begins where his Spring ends; The Royal *Phæbus* then mounting the *Apogæon* Chair of Honor, is removed to his greatest distance from the Earth, making to us in the Northern Countreys, largest Portion of Sun-shine and least quantity of shadow: Or, (which is all one) the longest Days, & shortest Nights to us on this side the *Aequator*.

This glorious Season beginneth this year (in the Meridian of London, Englands Metropolis) on June the Eleventh day, about twelve minutes past eleven of the Clock in the Morning, the Sun then just entering into *Cancer*; and it continueth all the time he passes the Signs of *Cancer*, *Leo*, *Virgo*. If you would know the true Philosophical and Cabalistical Significations of all the Four Seasons; You may please to Read my *Calendarium Astrologicum* for Anno 1681. where you have them plainly expressed.

3. Of the Autumnal Quarter.

The Autumnal or Harvest Quarter is the third part of the Astrological year, it being the declining Equinox, as the Spring is the inclining Equinox: These being always in opposition to each other, like *Asps* Buckers, as one goes up the other still goes down.

The Days and Nights are now again equal all the World over, and the Sun doth equally irradiate both the

T R I G G E 1683.

the Poles, as he did at the Beginning of the Spring.

This Season always begins where the Summer Quarter ends; viz. When the Sun toucheth the first Scruple of the Sign of Justice, or the Cælestial Libra, and continueth all the time he is Transiting through the Signes of *Libra*, *Scorpio* and *Sagittarius*. And in this year the Sun comes unto the said first Point of *Libra*, on September the thirteenth, at about Half an Hour past two in the Morning: The latter part of *Leo* then Ascending the Horoscope. and *Saturn* then making a sickly and penurious Autum n.

4. Of the *Brumal*, or *Winter-Quarter*.

The Winter-Quarter constantly begins where the Autumnal ends; and as Astrologers agree, initiates when the Sun salutes the first Scruple of *Capricorn*, the Earth being then farthest deflected from the Sun's Perpendicular Rayes, receiving greatest portion of Shadow, and least quantity of the Solar Beams, or Sun-shine, and so causeth shortest Days and longest Nights, to all those that dwell or inhabit on this side the *Aquator*. 801

Bright *Sol* is now in his *Perigæon*, or nearest distance to the Earth, being in exact opposition to his *Apoæon*, which is *Cancer*, or the Summer Solstice.

And this year, this Melancholy and dark Season begins on the eleventh day of *December*, about half an Hour past two of the Clock in the Afternoon, at v hieh time the Celestial *Twins* Ascends the Horoscope, (as in the Spring or vernal Figure;) and *Mars* afflicts the Popular Moon in the *Medium Cæli*. Winter-Contentions seldom period in the following Spring. Thus much for this year 1683.
